To whom it may concern:

I received a letter in the mail stating that due to some technical reason that I do not quite understand, my favorite radio station is in danger of not being heard. This frightened me greatly, because KLOVE has helped transform my life! It is the single most educational, helpful, encouraging, and truthful, straightforward, "tell it like it is" radio station that I have ever encountered. KLOVE is a part of our community. Why just this morning a friend and I were talking about how we love to support this radio station financially, and how it has helped us. I have conversations with many friends about what I learn from KLOVE radio, and how it's impacted a friend's life. Thousands of people not only listen to KLOVE in our community, but live by it, support it financially, play it in their businesses and learn from it.

KLOVE teaches people a real way to live. It teaches us about healthy marriages, which our community desperately needs, about raising healthy children, again, a strong need, about financial wisdom, about communication and many other things. Every person that I know needs these lessons.

I urge you to place an appropriate value on KLOVE. When I have been depressed, and even thought of taking my own life, KLOVE helped me, helped me see that it was not the way out, not the right thing to do. KLOVE is more than a pick-me-up, it's a get-me-through-it. It helps connect people, and gives hope to many when we are down. The DJ's are real, and honest. It is a vital part of my community.

I think without KLOVE, you would see a higher rate of suicides, and just general depression. Their help hotline helps a countless number of people that would not hear about the hotline if KLOVE were not around. Everyday, they help people that would want to commit suicide, and just quit life in general. Just ask the KLOVE staff. It is the 5th most listened to online station in the world, and the 2nd most listened to on line public station (listener supported), because they provide a vital service.

Hundreds of thousands of listeners would be impacted without those airways playing KLOVE.

Thank you for your time,  
Katrina Reed
